The AEC (Architecture, Engineering, Construction) industry and the related processes employed during planning, designing, building, manufacturing, occupying, maintenance, as well as the demolition of facilities all involve data and information that is used for a wide variety of purposes during the project lifecycle.

### **Building Information Modeling (BIM) Interoperability**

Risk Analysis concerns itself with the quantification of risk, the modeling of identified risks and how to make decisions from those models. Quantitative risk analysis (QRA) using Monte Carlo simulation offers a powerful and precise method for dealing with the uncertainty and variability of a problem.
